We are doing a fact sheet for the public and need the contact person you want on the fact sheet.

This is great news, thanks Gary! Regarding your questions, I am checking with our attorneys on both issues and will get back to you soon. We have a call in to the Trustee to get an update on the prospective buyer.

Monica:

I will be issuing a tasking to my START Contractor to begin sampling all of the containers on the site. I will be working on that today. Hopefully, it can be processed and we can be on-site early next week.

The meeting yesterday resulted in a verbal approval for cleanup of \$500,000 and the remainder will be obtained once the Action Memo is approved which hopefully will be sometime next week.

I have not been in the conversations with you and Susan recently but we need to insure that TCEQ is on board with doing the \$500,000 worth of work (T&D work, other) on the site that was previously indicated would be done.

Based upon conversations I have had with Susan, I have some questions:

1. Susan mentioned that you indicated something about a prospective purchaser and VCP. Can you fill us in on this development and what you think this may mean for the cleanup actions?

2. We have obtained 120 boxes of records from CES from our CID folks and some CDs of some or all of the boxes from the Trustee via Mickey Edmundson. I think it is crucial that our enforcement/cost recovery folks work together to review this information so that we can get to those that have contributed to the problems at the site. How do we do this?

Thanks

Gary Moore
